

FEAST ON FACTS

FROM ACADEMY AWARD® NOMINEE SCOTT HAMILTON KENNEDY
FOOD|EVOLUTION
NARRATED BY NEIL DEGRASSE TYSON

“A polished and provocative call for activists to be as scientifically minded as they believe they are.”
- *John deFore, The Hollywood Reporter*

Amidst a brutally polarizing debate marked by passion, suspicion and confusion, **FOOD EVOLUTION**, from Academy Award®-nominated director Scott Hamilton Kennedy (*The Garden*, *Fame High*, *OT: Our Town*), explores the controversy surrounding GMOs and food. Traveling from Hawaiian papaya groves to banana farms in Uganda to the cornfields of Iowa, the film, narrated by esteemed science communicator **Neil deGrasse Tyson**, wrestles with the emotions and the science driving one of the most heated arguments of our time.

In the GMO debate, both pro- and anti- camps claim science is on their side. Who’s right?
